# About us WALLINGS

MADE IN  
Lancashire

## A FAMILY RUN BUSINESS SINCE 1948

The farm was purchased by our great grandfather Tom Walling back in 1948. During that post war period, farming enjoyed good times and the countryside was a thriving place to live and work. However, since the late 1970's it has taken a bit of a battering from one thing and another. Incomes have fallen and farms have had to increase in size and specialise in order to survive.

The need to diversify and adapt continues today and here at Wallings we have always worked hard to remain ahead of the game in order to provide a sustainable business model in a rural setting. The Farm is still a working farm and a valuable part of our family business.

Three generations of the Walling family currently operate this working Lancashire dairy farm, providing employment for local people, playing a vital role for the local economy.

**Dad (Peter) - 'The Original Ice Cream Maker' and now the General Manager**

**Uncle Alan & Angus - The Farmers**

**Rob - Operations Manager**

**Phil - Wholesale Manager**

**Anna - Retail Sales Manager / Gelato Maker**

We started producing ice cream on the farm in 1986. The Cows provide our ice cream production team with its major raw material, fresh Milk.

We are all very passionate about our ice cream and proud of the success of the brand.

We supply our range of real dairy ice cream, non dairy ice cream and gelato style sorbets to a whole host of commercial outlets including restaurants, hotels, retail outlets, visitor attractions, theatres, ice cream parlours and delicatessens.

Our ice cream and sorbets are delivered by our own fleet of freezer vans, directly to your business from our farm.

Hope we can do some business with you soon.

*Peter Walling*

MADE ON THE

*Family Farm*

# The PROCESS

**1.** Farmer Alan's herd of British Friesians provide the Milk which is collected from the farm dairy across the cobbled yard

*Then the magic begins*

**2.** The Milk is first pasteurised, along with the cream, sugar and stabilisers

**3.** Once rested, the mix is sent through the homogenizer, this enhances the creamy taste of the ice cream mix

**4.** A plate cooler then brings down the temperature of the mix so it can be stored overnight in an ageing vat

**6.** Fast forward a few hard working hours and our product is then stored in our large freezer facility across the road, ready to go

**5.** At this point, the flavourings and colourings are added. Our production team then begin making our famous flavours

**7.** It's then in the hands of our drivers, our fleet of vans then deliver the ice cream to your door
